PENTCO
Supplying a Face to the Industry

SOFTOUCH

HAVING OPTIONS MAKES LIFE SMOOTH

February / 2019

DURABLE VALUE

Pentco uses the highest quality of materials to achieve a top of the line product which remains unsurpassed in the market.

By using State of the Art equipment and skillful personnel, we are able to offer our customers a product that is near flawless and backed by a warranty like no other.

Durability, UV light stability & longevity are some of the key factors that set Softouch apart from other coating processors.

Only premium grade MDF and superior quality finishing mediums are used to ensure a resilient, long wearing door that will give you many years of life. A Softouch door's endurance adds more value on top of its exceptional affordability.

Pentco uses only high quality UV stable finishes. Nitrocellulose lacquers used by our competitors, are not UV stable, they will yellow over time and are far less durable.

CAREFUL: Do not be mislead by low cost coated products, your durability *will* be compromised.

STYLE

Softouch doors come in a range of one and two piece routered designs, from the classic to the contemporary.

COLOUR

Now you can choose from an array of available colours. Or arrange to have us match that special colour that is a must for your design project.

TOUCH

The silky smooth finish of a Softouch door speaks to Pentco's commitment to quality.

FINISH

A Softouch door can be further enhanced by a variety of finishing options ranging from a flatter 10 degree sheen, to a 30 degree satin sheen, as our standard offerings. Our 6000 series can achieve a high gloss finish by using Acrylic Urethanes and Polyurethanes over a chosen base coat providing an exceptional smooth and mirror like surface.

CLEANING

Due to their quality, Softouch doors require minimal care. Use a soft, absorbent cloth, dampened with luke warm water to wipe off dust and fingerprints. For greases or other stains, use a mild hand soap.

Never use abrasive cleaning material, furniture polishes or bathroom cleaners that leave a build up or film on the surface.

AVAILABLE COLOURS (These colours are readily available at Pentco. If you require a custom colour match, please contact us.)

White P1	Frosty White P1	Snow White P1	Style White P1	Urban White P1	Cloud White P1	Antique White P1	Tidal Sand P2	Cyclone P2	Stone Grey P3	Arctic Grey P2
