## NEW AND RE-ENGINEERED

Our Phase Two Division, best known for producing high quality solid wood doors in years past, has taken a new green direction to provide doors utilizing engineered materials and recycled content, rather than the traditional solid hardwood materials from our forests. European technologies have allowed us to introduce some new options that we feel still have the appeal of our past traditional wood doors, with added durability.

## CONSISTENCY

As everyone knows, it is impossible to provide perfect grain and colour results when dealing with natural products. With our new, unique and fully engineered collection of door styles, the customer always receives a consistent product.

## REFINED STYLE

We are pleased to introduce our classic line-up of Phase two doors. With the beauty of uniquely finished wood, and the durability that will last a lifetime, our Coastal Shaker, Terzetto & Stretto doors will make any space feel like home.

The Coastal Shaker, is a classic looking 5 piece door with a 2 3/4" frame. Choose from a huge range of colours and woodgrain offerings.

The Terzetto, a 3 piece design, which uses a V-joint to separate the horizontal grain direction of its center panel from the vertical grain direction of its outside stiles. Also available, with a vertical center panel and top & bottom rails is the Terzetto T/B.

The Stretto is just like the Terzetto, only with 'narrow' 33mm stiles. You can also switch up the look when choosing the Stretto T/B, with it's vertical centre panel and narrow top & bottom rails.

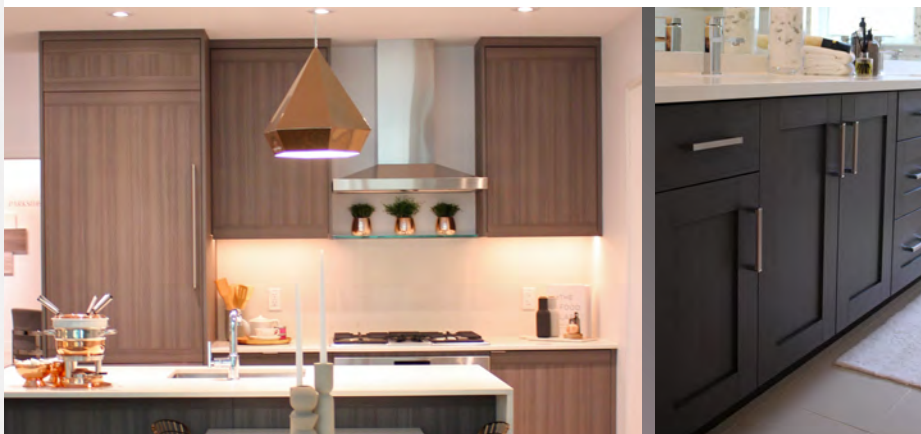

The Terzetto and Stretto doors have a clean modern look, with a subtle detail.

## OPTIONS WITH VERSATILITY

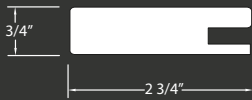

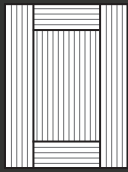

With the help of our design community, laminate options were carefully selected to showcase the Coastal Shaker, Terzetto & Stretto doors. You can now have the beauty of a classic wood door, with added durability & consistency. With our selection of **Greenlam** & HQ High Pressure Laminates your doors will continue looking great for years to come.

There are no finishing requirements necessary, saving you both time and money.

- ✦ PERFECT COLOUR MATCHING
- ✦ CONSISTENT PRODUCT
- ✦ FADE RESISTANCE
- ✦ HEAT, SCRATCH & STAIN RESISTANT
- ✦ BEAUTY & TEXTURE OF REAL WOOD
