

FULLWRAP
LAMINATE AND VENEER DOORS

SOFTOUCH
PAINTED DOORS

PHASE II
WOOD DOORS

GREEN = GREEN

PENTCO = GREEN²

EFFICIENT & SUSTAINABLE

We are one of the largest eco-conscious cabinet door manufacturers and distributors in North America. Our production practices allow us to fine tune our operation to minimize waste and process recycleables back into the production stream in a methodical and efficient manner.

The components that are used in all our product lines are rated for low particulate and chemical emissions and are derived from renewable, recyclable and sustainable resources that can contribute to LEED credits for your renovation and development projects.

VERSATILE & EXPERIENCED

With 30+ years of experience, Pentco is a trusted resource for many designers and developers alike. Pentco's 80,000 square foot facility is equipped with advanced machinery and employs stringent green manufacturing processes whenever possible. Our facility also allows us to service the market with a variety of door and panel products that is unmatched. From our Fullwrap Laminate and Wood Veneer door lines, our Softouch painted doors, and our wood Phase II doors, we are equipped to customize our products to meet your specifications and vision.

EXCEPTIONAL & ECONOMICAL

A commitment to quality and value is what drives us to deliver the finest products to our clients. We believe that no one should sacrifice quality for price, nor should price be the sole dictate for quality. We adhere to the idea that our clients should be able to get the best craftsmanship and materials for the price. We do not cut corners or offer lesser quality products. We just make exceptional doors and panels very efficiently. You will see that the longevity of a Pentco product is the result and proof of our integrity and devotion to our ideals.
